WE IMPROVE YOUR LIFE

Premium office desks with DL14 systems

A DL14 system is the perfect choice for premium desks. When choosing DL14 in a system for your office desk, you choose a premium column, which fulfils all expectations.

Create a desk that fits everyone: short or tall

The DL14 ensures an extreme low built-in height of a desk and at the same time it has a long stroke length thereby ensuring that the finished desk fits everyone, short or tall. – And fulfils market standards.

Stick to your design

From a design perspective it is possible for your range of desks to have the exact same design even when the range includes electrical height adjustable desks and fixed desks. – No motor housing is visible as the motor is integrated in the profile of the DL14 column.

Clean design

Give your customers an electrically height adjustable desk with a clean design. The DL14 makes

it possible to design a desk without a crossbar and still obtain stability.

Ensure long lifetime on your desk with PIEZO™

Premium furniture today is meant for everyday use for a number of years, but by accident you may damage your goods or something in the surroundings when you drive your desk up or down. This could limit the lifetime or in worst case destroy the desk or obstacle. An example could be if you by accident drive your desk down into a cabinet or worse down into your beloved coffee cup painted by your son misplaced on top of the cabinet. A DL14 system now features PIEZO™, which eliminates the outcome of these hazards.

With the DL14 system you get an optimum system fulfilling all market requirements as diverse as to design, height and techniques. The DL14 is compatible with CBD4/CBD5 control boxes and belonging desk panels. Read more about LINAK and our products: www.linak.com/deskline

DL14 now features *PIEZO™*, a unique hardware based system, which can register if the desk drives up or down into an obstacle. The system reacts on this obstacle when the load changes just a bit and stops the system and drives the desk a bit in the opposite direction avoiding the squeezing situation. *PIEZO™* is a state of the art system and compared to other anti-collision systems, *PIEZO™* is more sensitive and reacts faster.

Top demands for premium office desks:

- Perfect design
- No crossbar
- Slim - sleek - silent

CHOOSE LINAK FOR...

- A world leading manufacturer of actuator systems
